DETAILED ACTION

1. The Japanese Document in information disclosure statement filed 08/18/2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because no translation or concise explanation was attached. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

REASONS FOR ALLOWANCE

- 2. The following is an examiner's statement of reasons for allowance:
 - With regard to claim 8, as the closest reference, Sakakima et al (US 6,567,246) shows a magnetoresistive element wherein the layer having the oxide as the principal component contacts an opposite surface of the magnetization free layer to a non-magnetic layer, but does not show the contact is via a second non-magnetic layer.
 - With regard to claim 23, as the closest reference, a combination of Gill (US 6,275,363) and Tan et al (US 5,962,080) shows a magnetoresistance effect element including: a magnetization fixed layer, a magnetization free layer, a non-magnetic intermediate layer, a high conductive layer being stacked on one side of the magnetization free layer remoter from the non-magnetic intermediate layer; and a non-magnetic layer provided on one side of the high conductive layer remoter from the magnetization free layer, **but fails to show** that the

Application/Control Number: 09/944,075

Art Unit: 2652

current is applied between leads 13 in a direction parallel to the surfaces of two ferromagnetic layers.

 Applicant asserts that this second non-magnetic layer can reduce the magnetic field due to the current applied to the free layer (Specification, p. 34, lines 24-28).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
